Professional Summary

Driven and ambitious software developer that's passionate about software development, networking, and cybersecurity, with a strong foundation in programming and hands-on experience in IT environments. I am proficient in designing, developing, deploying, and maintaining web and mobile applications. Skilled in using **Microsoft Azure** for virtual machines, cloud deployment, and online SQL Server management.

Strong hands-on experience with **C#, Java, JavaScript, HTML, CSS, and SQL**, as well as **GitHub** for repository management and app deployment. A dedicated and fast learner with a passion for technology, cloud systems, and problem solving ready to contribute to both **software development** and **IT support environments**.

Skills

- Programming Languages: C#, Java, JavaScript, SQL, HTML & CSS, Linux
- Cloud & Tools: Microsoft Azure (VMs, SQL Server, Deployment), GitHub (Repositories, CI/CD), Cisco Packet Tracer
- Other: Networking, Cybersecurity, Troubleshooting, Front-end & Back-end Development

Education

Diploma in Application Development | Durban University of Technology
2023 – 2025 (Completed)

- Gained knowledge in software design, database systems, cybersecurity, and networking fundamentals.
- Earned certificates at DUT for systems setup and networking using Cisco Packet Tracer.

Cisco Networking Academy Certification | Certified Packet Tracer User
June 2023 – Sep 2023

Sidilile High School | National Senior Certificate
2018 – 2022

Portfolio

I have created a number of projects including E-Commerce Applications: Built and deployed several online store web apps using C#, HTML, CSS, JavaScript, and hosted them on Microsoft Azure. Pizzeria App (Java, Android Studio): Developed a full-featured pizza ordering app that allows clients to order, pay, and collect their orders via the app.
